Be a part of the JET SET!

How are you innovating in the classroom?
If you'd like to share your innovations and receive peer support for your teaching ideas, then submit your JET SET idea at https://www.journalofeconomicsteaching.org/symposium/

JET SET proposals should demonstrate innovative or experimental pedagogy, new technology, or other ways to improve teaching at the undergraduate or K-12 level. Your session can be a 20-30 minute presentation or an applied workshop.

Proposals should be detailed so it's clear how your time will be used. You should make it clear what the goals of the session will be, and how it will help attendees become more effective economics teachers.

Some ideas include:

- New media or new media uses for teaching economics

- New approaches to teaching a particular economic concept

- Innovative student assignments – in class or online

- Methods of assessment

- Teaching economics using popular culture or literature

- Classroom games, simulations, and experiments

- Conducting economic discussions

- Collaborative learning

Submissions must include:

- A description of about 250 words explaining the presentation, including ways in which conference participants will benefit from attending the session

- Contact information for all presenters

- Information on audio/visual needs (projector, internet, audio, etc.)*

- A short, 2 - 3 sentence description of the session for the program

The abstract submission deadline for JET SET has been extended to June 17, 2022. However, we will be accepting abstracts on a rolling basis. Once we fill all the concurrent sessions, we will close the submission system. We look forward to seeing you in Omaha!

*If your submission is accepted, you are committing to register for and attend the conference.

Post-conference publishing workshop:

Get your idea on the runway and approved for take-off in a future issue of JET! Immediately following the conference, join our editors on August 7th for a practical, results-oriented workshop that will provide you with a pre-flight checklist to get your idea off the ground and submitted for publication.
